

Young Vandal's Aim Was Good

An 11-year-old Lomita boy, nabbed after he assertedly shot out the windshields of six cars on a used car lot at 25212 Pennsylvania ave., Lomita, staunchly defended his marksmanship.

Questioned by deputies about causing \$176 damage to the automobiles with his air rifle, the youngster told them that it was impossible he inflicted the loss.

"I'm a better shot than that. I was aiming for birds," he told juvenile officers.

Housewife Gets Jail Sentence

A South Gate housewife was sentenced to 180 days in jail Friday after she pleaded guilty to a drunk driving charge in Torrance Municipal Court.

Navy Givs High Grade to Local School Alumni

Torrance and North High graduates rate tops among those taking Navy tests, Chief Vince Lawlor, Navy recruiter for the area, has informed local school officials.

Recent Navy enlistees from Torrance all have ranked considerably above the score required to obtain Navy school training, and 10 of last month's 18 enlistees were in the top two per cent. Good ratings on the Navy tests are required for an enlistee to be guaranteed a training school.

Lawlor said recruiters urge all students to complete high school before enlisting in the service, since an increasing amount of training is necessary in today's increasingly complex world.

Peeping Tom Hearing Stated in Local Court

A Lomita plasterer will face preliminary hearing Tuesday before Municipal Judge Donald Armstrong on a Peeping Tom charge.

Torrance police, who arrested Stephen Mathew Pulvers, of 2448 W. 248th st., on July 19, said they had to chase the suspect through a trailer court before they managed to capture him.

Officers said they received a call to 1842 Torrance blvd. When they arrived, they saw the suspect take off on foot through the trailer park.

They said they finally found him crouched on the ground underneath a trailer.

DEAF MAN PERFECTS SMALLEST HEARING AID

Aug. 4, 1958—A remarkable midget hearing aid has been perfected by a man who has been hard of hearing for nearly 20 years.

The new small aid has no dangling cords or separate transmitting units and was announced in California today as the most revolutionary product ever to appear on the market for the hard of hearing.

It is especially made for those people who can hear but not understand. This new hearing instrument provides "ear-level" hearing with the wearer picking up speech, sounds, television, and radio at his ear rather than at a transmitter located in the wearer's clothing.

Due to the use of 4 transistors, the user cost is extremely low and the instrument weighs approximately 1/4 ounce. It is about the size of a sewing thimble.
